Product Overview

Instructions for Use

- The built-in USB-C cable allows both charging other devices and recharging the power bank itself.
- Connect the built-in USB-C cable to a laptop, tablet, or phone. You can also connect additional cables to charge up to three devices simultaneously.
- Use a USB-C charger with the built-in cable, plug it into a power outlet, and recharge the power bank. Alternatively, use another compatible USB-C charging kit.
- Disconnect the power bank once charging is complete.

Maintenance and Cleaning

Gently clean the power bank with a dry, soft cloth to avoid internal short circuits. Do not use corrosive cleaners as well.

Warranty and After-Sales Service

This product comes with a 1-year warranty. If there is non-human damage during normal use, please contact our customer service, and we will provide you with service and support.

The warranty does not cover damages caused by human factors, improper use, or failure to operate in accordance with the instructions provided.

During the warranty period, please keep the Purchase Receipt, Product Packaging, and User Manual for after-sales service purposes.

Notes

- Fully charge the power bank before first use to ensure optimal performance.
- Perform a full charge cycle (0% to 100%) every 2-3 months for accurate battery level readings.
- Avoid overcharging—disconnect the power bank once fully charged. Do not drain the battery completely; recharge when the level drops over 20% to prolong battery life.
- For long-term storage, maintain a charge level between 40-80% to prevent over-discharge and battery degradation.
- Do not store the power bank above 45°C or in direct sunlight. Do not put it in fire or any other hot environments.
- Do not disassemble, repair, modify, or replace any parts of the power bank.
- Do not drive nails into the power bank or hit it with a hammer.
- Do not immerse the power bank in water or expose it to moisture.
- The power bank may warm up during use, but if it stays below 45°C, it's safe to use.
- Carry the power bank in a shockproof, moisture-proof bag and keep it away from metal objects like keys or coins to prevent short circuits.
- If the power bank becomes unusually hot, swells, or emits a smell, stop using it immediately and keep it away from fire.
- Use good-quality charging cables; damaged cables can lower charging efficiency and pose safety risks.

Important Safety Tips

- If the battery is not replaced properly, there is an explosion risk. Only batteries of the same type or equivalent type can be used for replacement. And only maintenance personnel can replace it, not ordinary personnel;
- Batteries must not be exposed to environments such as direct sunlight, fire or similar overheating conditions;
- If consumers charge with a power adapter, should purchase a power adapter that has obtained CCC certification and meets the standard requirements for use;
- Product should be placed on the desktop when using, if it needs to be used in contact with the human body, the contact time should be less than 10 seconds;
- Do not use after soaking in water.
